

Books of the Promised Messiah DVD

All of the writings of Hadhrat Mirza Ghulam Ahmad^{as}, the Promised Messiah, and his Mulfoozat are presented as scanned PDF files. Please follow these instructions to make use of this library:

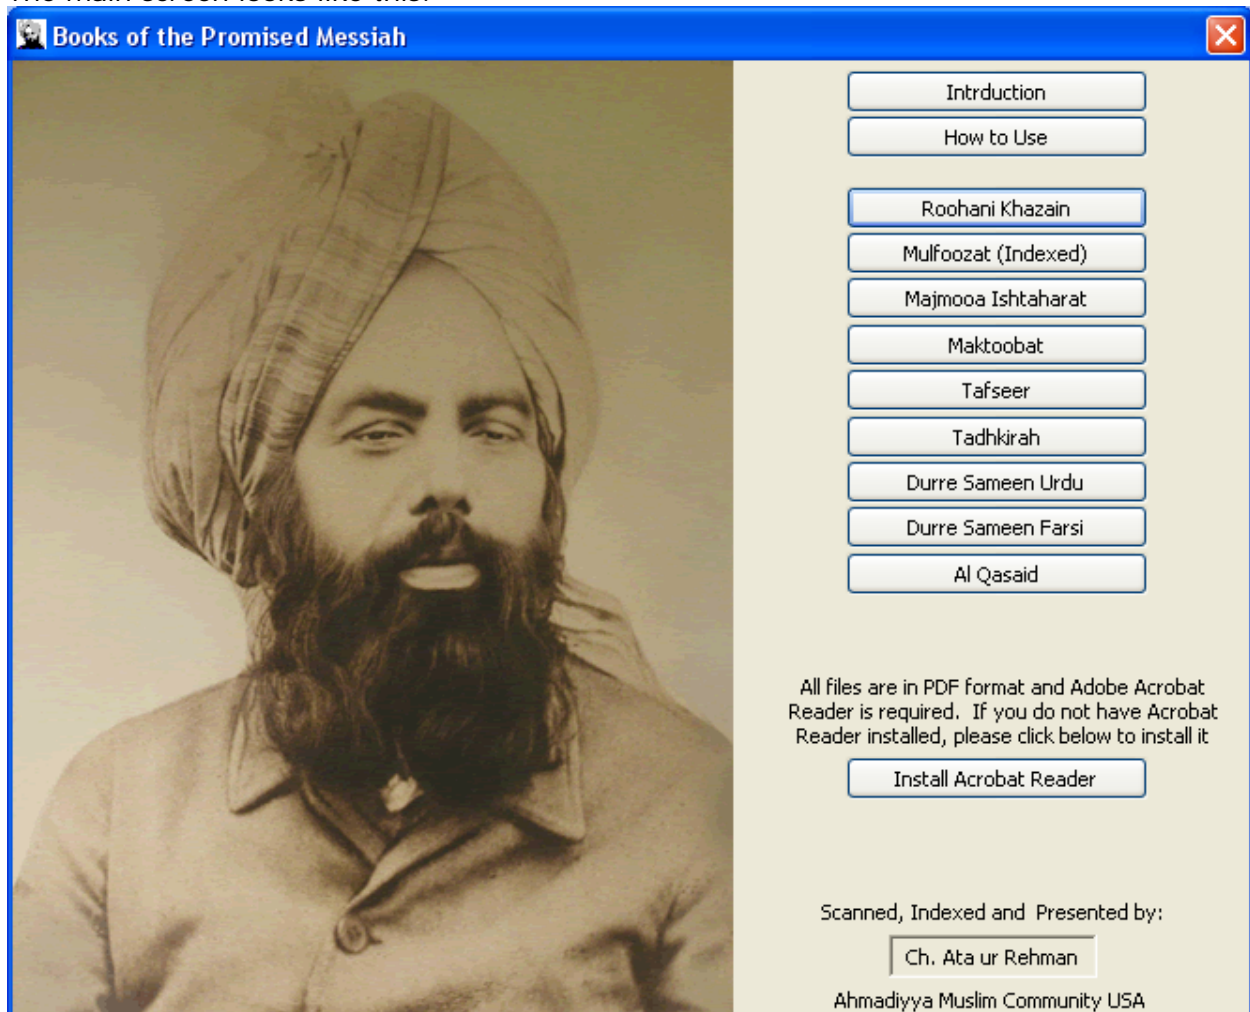

System Requirements

A personal computer running any version of Microsoft windows is required. A DVD drive is required. CD drives do not read DVDs.

Running the DVD

The DVD comes with the "Autorun" feature: when you insert the DVD into your DVD drive, it will run automatically and within about 15 seconds, the main screen will come up. If this does not happen, please double click on the "My Computer Icon". Then double click on your DVD drive icon. This will show you all the files on the DVD. Double-click on the file amiDVD.exe. This will start the program.

The main screen looks like this:

Install Acrobat Reader

Most new computers come with the Adobe Acrobat Reader installed. However you may not have the latest version. The latest version of the Acrobat Reader can be downloaded for free from the Adobe Website www.Adobe.com.

For convenience version 6.1 of the Acrobat Reader is included on the DVD. Please click on the Install Acrobat Reader button to install it. If you get a message that you already have a newer version installed, you may cancel the installation by clicking on the Cancel button.

Use of Index for Mulfoozat and Roohani Khazain

An extensive subject index for Mulfoozat and Roohani Khazain is included. When you click on the "Mulfoozat" or the "Roohani Khazain" button, the file will open. You will see the text on the right hand side and the index on the left hand side. Please note that many of the topics have a small + sign to the left of them. This means that there are further subtopics under these. Click on the + sign to expand sub-topics. Sub-topics may have more sub-topics if you see the + sign to the left of the sub-topic.

Please continue to click on the + signs until the sub-topic of interest is fully expanded. Then you will see the references showing the page number / line number of various pages where the topic is discussed. The references do not have the + sign on their left. Clicking on the reference will bring up the required page on the right hand side. On some computers, double clicking on the reference may be required.

Important: Clicking on the topics with the + signs to their left does not bring up anything. You need to expand the topic of interest by clicking on the + sign itself and then click or double-click on the reference to bring it up. This is a quirk of the Acrobat reader and could not be avoided.

The details of how the index was made can be viewed by clicking on the "Introduction" button.
